

Bureau of Transportation Systems Management & Operations (TSMO)

---

***NH Department of Transportation's Mission***

*Transportation excellence enhancing the quality of life in New Hampshire.*

---

***Transportation Management Center's Mission***

*The Transportation Management Center's mission is to detect, verify, and respond to incidents that affect the state transportation network. It serves to improve traffic operations, provide the public with current, accurate and useful travel and commuter information that promotes safe and efficient travel, as well as facilitates the maintenance of New Hampshire's transportation system.*

# New Hampshire Transportation Management Center Coverage Areas by District

The State of New Hampshire is divided into six Districts and the New Hampshire Turnpike System comprising of approximately 9,266 lane miles.

## ITS Equipment List

Closed-Circuit Television (CCTV) Cameras	2014 Total	2015 YTD
--	------------	----------

CCTV cameras are used to pinpoint and monitor traffic events so that information can be disseminated quickly and accurately.

71	76
----	----

### Dynamic Message Signs (DMS)

DMS aid in sending messages to motorists to inform them of traffic events that may be impacting their route ahead.

48	51
----	----

### Road Weather Information System (RWIS)

A RWIS collects and displays data from a network of pavement and atmospheric sensors to provide site-specific weather and pavement surface condition information.

17	20
----	----

### Variable Speed Limit Sign (VSL)

VSL are speed limits that change based on road, traffic, and weather conditions.

10	10
----	----

# Summary

<b>Unplanned Incidents</b>	<b>Current Month</b>	<b>2015 YTD</b>
Operators log information about each unplanned incident including date/time, location, traffic impact, and duration.	119	1,292

<b>Planned Incidents</b>	<b>Total Planned Incidents</b>
Operators log information about each planned incident including date/time, location, traffic impact, and duration.	251 1,863

<b>Communication</b>	<b>Total Calls</b>
Operators log all incoming and outgoing control room communications, engaging various incident responders and stakeholders.	2,078 20,753

<b>Work Zones Communication</b>	<b>Total Construction Calls</b>
Construction related activities or communication that's outside of planned incidents.	375 2557

<b>DMS Messages</b>	<b>Total Messages</b>
All changes to DMS are logged and reviewed.	722 13,739

<b>Public Outreach</b>	<b>Total Webpage Users</b>
Operators use Twitter and nhtmc.com to inform motorists about traffic events and other road related information.	1,585 28,123

# Unplanned Incidents

Increased staffing within the TMC is necessary during normal business hours to better facilitate daily operations while also managing unplanned incidents. Incidents are tracked by the time at which the operators are notified of the start of the event.

## Current Month - Incidents by Type

This graph shows the type of incident totals for the month.

### Types of Incidents:

**No Closure:** No lane closures occurred during the incident.

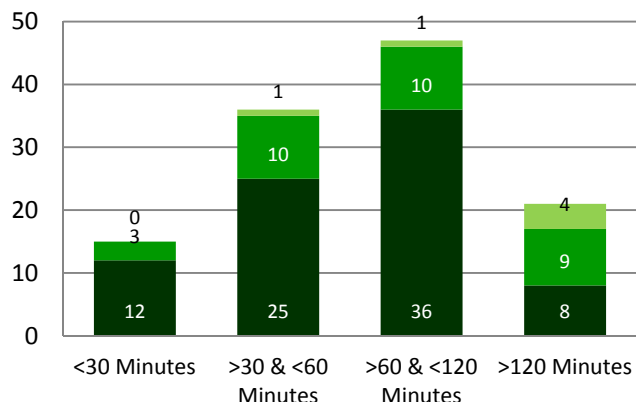

**Partial Closure:** Only a part of the roadway was closed.

**Full Closure:** All lanes were closed during the incident.

**Severe Weather:** The incident was due to severe weather causing an impact to the roadway. (No severe weather for this month.)

## Current Month - Incident Duration

This graph shows the duration history of incidents

## Current Month - Incident by Road

This graph shows which type of roadway the incidents occurred on.

# Planned Events

Additional staffing within the TMC is necessary during peak hours to meet the demands of daily planned operations. Planned Events are tracked by the time at which the operators are notified of the start of the event.

## Current Month - Incidents by Type

This graph shows the type of incident totals for the month.

Planned Events that impact the roadway, shoulder, or a ramp include events such as construction, bridge maintenance, or road maintenance. Each type will result in a partial closure or full closure.

## Current Month - Incident Duration

This graph shows the duration history of incidents.

## Current Month - Incident by Road

This graph shows which type of roadway the incidents occurred on.

## Current Month - Calls by Type

Dispatchers receive different types of calls throughout the day. They log the type of call and review this information monthly.

## Disseminated Weather Related Information

### Current Month - By Type

This graph shows the type of weather related information that was disseminated to various other agencies.

### 2015 Totals

This graph shows the total weather related information that was disseminated for the year so far.

# Work Zone Communication

## Current Month – Construction Calls

This graph shows the different types of construction related calls that dispatchers receive.

## Incidents Occurring in Work Zones

This graph shows the total number of incidents reported on Work Zone Crash Reports from the Bureau of Construction..

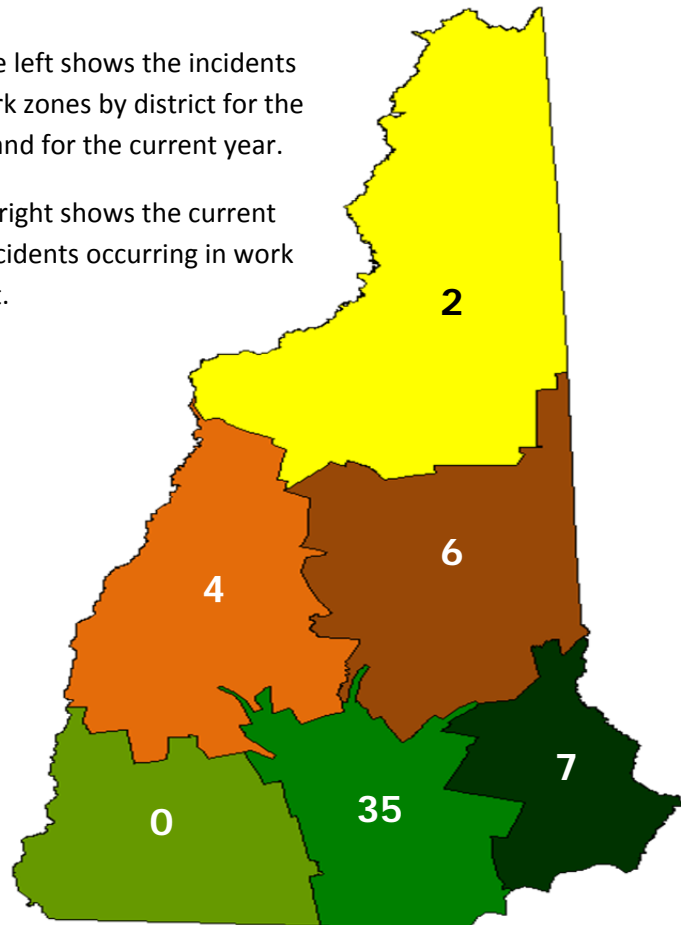

## Incidents Occurring in Work Zones by Location

The graph to the left shows the incidents occurring in work zones by district for the current month and for the current year.

The map to the right shows the current year total for incidents occurring in work zones by district.

# DMS Messages

## Current Month - Messages by Type

This graph shows the type of message that was relayed to the public by being displayed on the dynamic message sign (DMS).

## Total Messages - 2015

This graph shows the total messages that were posted to DMS for the year so far. It also shows the months with the lowest and highest messages that were posted.
